

Part	Part. no.
1 Plastic cover	PL0034
2 Handrail	HL1200
3 Wrist arch	HL1240
4 Handrail brace	HL1290
5 Bolt M10x20	BU1201/BU1200
6 Nut M10	MU1001/MU1010
7 Bolt M10x60	BU1601

Part	Part. no.
8 Standing platform	SP3040
9 Hinge	GJ3400
10 Gate hoop	HL5843
11 Self-drilling screw 5.5x22	SS5221/SS5225
12 Gate fittings	BX0004
13 Outer sleeve Ø42	UH0515
14 U-profile step platform	ST0425

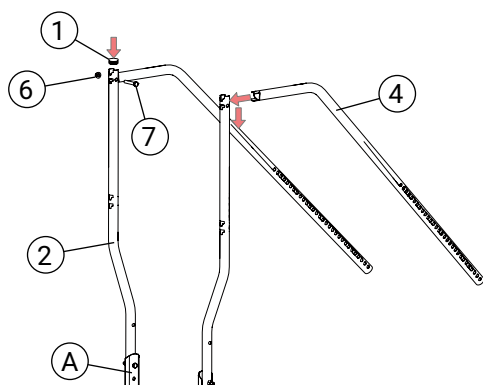

1 Installation of handrails

To be installed on the outside of the ladder using 2 bolts + nut (7,6) per handrail. Insert the plastic cover (1) on each handrail.

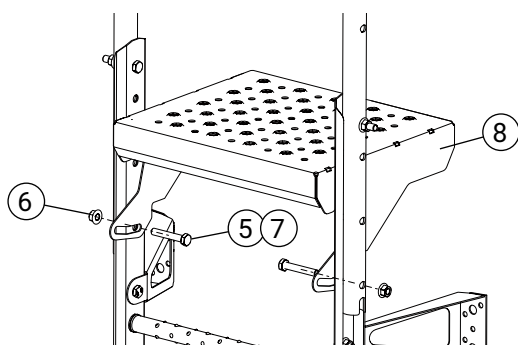

2. Installation of wrist arch

Tap the handrail arches (3) down into the handrail and lock using 1 bolts (7) + nut (6) per handrail. Insert the plastic cover (1) on each handrail.

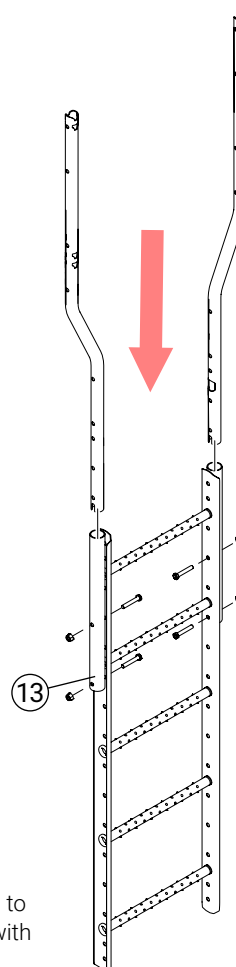

3. Installation of handrail braces

Tap the handrail brace (4) down into the handrail (2) and lock with 1 bolts (7) nut (7,6) per handrail. The lower end is to be installed in the roof ladders (A). Insert the plastic cover (1) on each handrail.

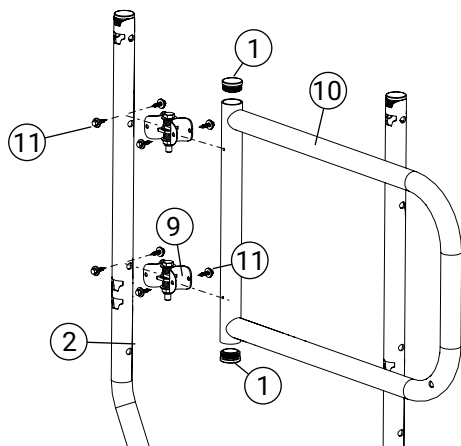

4. Installation of step plate

The step plate (8) is to be hooked on the top rung and bolted to the side of the steps (7,6 or 5,6).

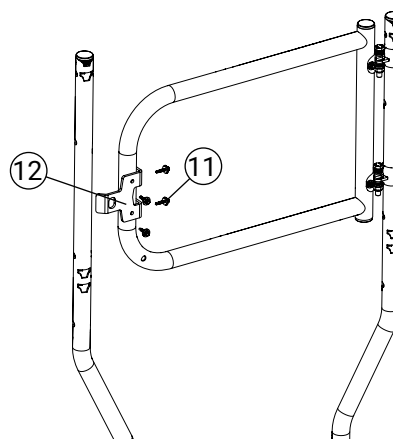

5. Installation of loose handrail

Outer sleeve (13) is bolted to the outside of the ladder with 2 bolts + nut per sleeve.

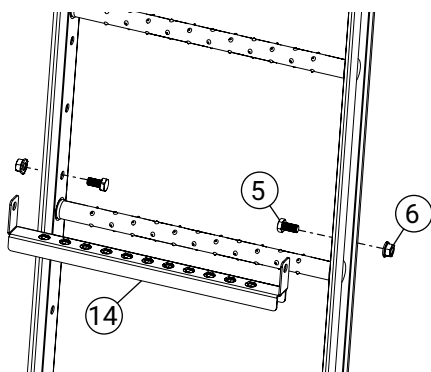

6. Installation of hinges

Fit the hinges (9) to the gate frame (10) using 2 self-tapping screws (11) per hinge in the pre-drilled holes. Then install handrails (2) using 2 self-tapping screws (11) per bracket. Insert 2 plastic covers (1).

7. Installation of loose lugs

Install the hinge halves (12) using 2 self-tapping screws (11) per half.

8. U-profile step platform installation

The U-profile step platform (14) is installed using 2 bolts (5) + nut (6).
